

# MICRO TORR® Specifications MC9000

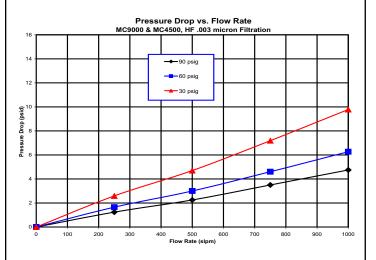

**SAES** is the worldwide leader in gas purification technology. We offer a complete line of gas purifiers for virtually all bulk and specialty gases.

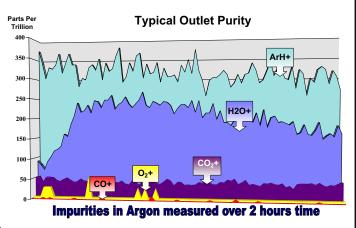

Extensive experience in the interaction of gases and materials, combined with an uncompromising dedication to quality and service, has made **SAES** the world's leading supplier of gas purifiers. Our total-integration approach to manufacturing, from purification materials development to purifier installation at customer facilities, ensures not only the best product, but also unparalleled service and support throughout the world.

**MicroTorr**® ambient temperature gas purifiers are designed to remove impurities from many different gases, including nitrogen, rare gases, hydrogen, ammonia, arsine and phosphine, HCl, and many others. Impurities in these gases are reduced to less than 1 part-per-billion, in most cases.

The **MicroTorr** line was designed with total application flexibility in mind. In addition to sizes based on flow rate, a wide variety of valve and filter configurations is also available.

**MicroTorr** purifiers are manufactured with the same superior quality found in all SAES products. Analytical testing is performed utilizing APIMS technology to certify maximum performance. All models are CE/PED compliant.

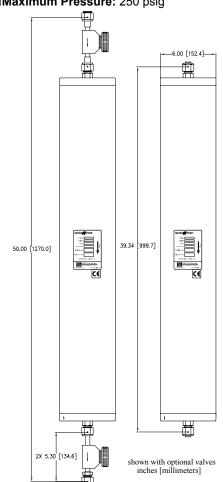

# □Lifetime

1 year based on typical 5-9 grade gas at nominal flow. (Consult factory for specific lifetimes.)

□Maximum Flow: 1000 slpm
□Nominal Flow: 300 slpm
□Maximum Pressure: 250 psig

### **Mechanical Specifications**

| Model                  | MC9000-*                            | MC9000-*V                           | MC9000-*F                           | MV9000-*FV                          |  |  |  |
|------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|--|--|--|
